DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: Applicant's Brief precipitated a reconsideration of the Examiner's grounds of rejection and a reassessment of the applied prior art. The Examiner is convinced that the Examiner's suggested amendment to independent claim 1 (10/27/2005+11/3/2005), as solicited by Mr. Lee, resulting in "wherein all surfaces defining the gas channels have a full extent defined by a surface of the injector and a surface of the reaction chamber" render the pending claims patentable in the context of the other structural limitations of claim 1. The closest prior art during prosecution being WO 01/43857 A1 (see attached translation). An updated search added US.Pat. 6,402,849 B2 for further consideration. However, all the cited prior art, as well as the closest prior art *do not* teach or suggest the claimed structure of the sole independent claim 1. Specifically, none of the prior art teach bifurcating gas channels such that "wherein all surfaces defining the gas channels have a full extent defined by a surface of the injector and a surface of the reaction chamber". This claim limitation is explicitly shown in Applicant's Figures 3A and numerous embodiments of Figures 5-9.
